WORK EXPERIENCE

Infobytes Technosys: *Full-Stack Developer Intern*   11/2024 – 04/2025

- **PayTrakz**: Developed an advanced expense tracker web application using **React.js** designed for efficiently managing and monitoring expenses with real-time data insights and secure transaction handling. Improved UI performance and responsiveness for a smoother user experience.
- **Flutter Training & Project**: Completed 1-month training in flutter framework, including a project on Workflow Automation Systems.
- **Dairy Delivery App**: Collaborated on the development of a **Flutter** mobile app for delivery of dairy products, contributing to both UI and backend API integration.

PROJECT

Vehicle Service Management System: (**GitHub Link**) *PG-DAC Project*   01/2024 – 02/2024

- **Developed using**: Spring Boot, .NET MVC, REST API, React.js, MySQL, Microservices Architecture, GitHub
- **Description**: Developed a one-stop platform where service centers of multiple automobile brands can register and list their services. The system streamlines service booking for customers by eliminating the need for brand-specific apps. It acts as a bridge between customers and service providers via a user-friendly web interface, supporting real-time booking and transparent service listings.
